About

I am a developer who loves building scalable, performant apps. I have 4+ years of experience. I am passionate about everything JavaScript, react-native, NodeJS, Mobile/Web development, automation, knowledge sharing, music and art. I thrive in fast-paced environments. I collaborate well with others. And I love learning new technology.

Professional Skills

React/Redux

React Native

JavaScript, Typescript

ElectronJS

HTML/CSS

Jest

Progressive Web Apps

Hybrid Apps/Ionic/Cordova/Flutter

NodeJS

MySQL / PostgreSQL

PHP

Python (Flask)

Blockchain

VueJS

Netlify

Git

Scrum

Full-stack Developer, Freelance

March 2022 - Present

Luton, UK

- Worked as a freelancer creating solutions on contract and building individual projects
- Built a web browser using electronJS and integrated a reward system and custom search engine.
- Built a wallet app in both Cordova and Flutter to compare responsiveness and performance.
- Migrated a few old projects from JavaScript to Typescript.
- Took a training course on React Native.

Lead Blockchain/Smart Contract Developer, Strata.ly

July 2021 - March 2022

Global

- Strata.ly is an online one for all suite providing wide range of solutions through blockchain and cryptography.
August 2021, I introduced a reward system to reward users for their contribution to the community by rewarding them an amount of a BEP20 token I created for tasks done on the community.
- Sep - Dec 2021, I wrote multiple smart contracts for different purposes e.g (airdrop, token lock, liquidity hold) all while planning an architecture for an IDO Launchpad like unicity.network.
- Jan 2022, I built the decentralized IDO Launchpad with web3.js connecting the BEP20 network and ERC20 network and also full implementations of the smart contracts I wrote, to make launching tokens and liquidity for small businesses easier and less expensive.
- Built a News Reward Platform in Python Flask and Hosted it on DigitalOcean.
- Built a wallet app and a crypto-exchange app for the developed BEP20 token and blockchain using Flutter.

Full-stack Developer, Freelance

📅 October 2019 – July 2021

🌐 Global

- Built 10+ web applications and mobile apps.
- Worked as a Lead developer in 3 projects.
- Built a lightweight and scalable MVC Framework in PHP.
- Built E-commerce store with functioning checkout systems.
- Created clones for major applications like Netflix and Apple music.
- Trained in various front-end technologies like ReactJS, VueJS, Bootstrap and Tailwindcss.

Education

Bachelor of Software Engineering, University of Bedfordshire (2022)
